

Eljen GSF Module

Storage and Handling

Instructions

- Any tight-fitting plastic wrap from shipping is to be removed.
- The Modules shall be stored indoors, or if outdoors, raised off the ground and fully covered by a loose-fitting UV rated tarp.
- The modules shall be protected from getting wet. This adds weight and subsequent handling can cause damage. Care must be taken when handling wet modules.
- Long term storage **MUST** be indoors in a dry UV free environment.
